PROFESSIONAL SUMMARY

Results-driven Software Engineer with a BS in Software Engineering (Minhaj University, 2025) and 1+ year of hands-on experience building and shipping production-grade web and mobile applications. Proficient in the MERN stack and React Native, with a proven track record of delivering clean, scalable code and pixel-perfect UI across 30+ cross-platform mobile apps — including an end-to-end international client delivery. Experienced in the full product lifecycle from Figma mockup through development, testing, and app store deployment on both Google Play and Apple App Store. Skilled in agile workflows, REST API integration, real-time features with Socket.io, and GPS-based services. Passionate about building impactful, user-centered products and eager to contribute to a forward-thinking engineering team.

PROFESSIONAL EXPERIENCE

Junior Software Engineer · Weiblocks

□ DHA Phase 6, Lahore, Pakistan · □ Oct 2025 – Present (1+ Year)

- ▶ **30+ apps shipped** — Built and delivered 10+ production-grade cross-platform mobile apps using React Native (CLI & Expo) for iOS & Android, including a Attendance Tracker ,UniQuill app , Step & water tracker, Pixel Art , Vision Board, and ABC Learning App.
- ▶ **International client ownership** — Sole developer for Radiuz, a full-featured location-based events discovery app for a Nigerian client; architected, built, and deployed the entire product from zero to live on both Google Play Store and Apple App Store.
- ▶ **Web platform development** — Contributed to the Expensia web platform's frontend using React.js; implemented dynamic UI components and RESTful API integrations for real-time expense tracking.
- ▶ **Native Android services** — Implemented Android foreground services to sustain reliable background task execution, guaranteeing consistent push notifications regardless of app lifecycle state.
- ▶ **State & API management** — Integrated third-party REST APIs and managed application-wide state with Redux Toolkit and Context API; enforced Git branching discipline across agile sprint cycles.
- ▶ **Design-to-code precision** — Translated Figma mockups into responsive, production-ready interfaces using Material UI and custom CSS with zero deviation from design specs.
- ▶ **End-to-end deployment** — Owned the complete app store submission pipeline: code signing, Play Console & App Store Connect listings, screenshots, metadata, privacy policy, age ratings, and post-launch review management.

KEY PROJECTS

Radiuz — Location-Based Events Discovery App

live link : (https://play.google.com/store/apps/details?id=com.radiuz.app&pcampaignid=web_share)

React Native (Expo) · Node.js · Express.js · MongoDB · Google Maps API · Socket.io · JWT · Cloudinary

[International Client — Nigeria] [Solo Developer] [Live on Google Play & App Store] [Category: Events / Social]

- ▶ **Product ownership** — Designed and built Radiuz end-to-end for a Nigerian client; a location-aware events platform that shows live events on an interactive map centered on the user with an adjustable discovery radius.
- ▶ **Core features** — Delivered public/private event creation with photo uploads, an RSVP system, real-time likes & comments via Socket.io, bookmarks, social sharing, and community report/moderation tools.
- ▶ **Access control & security** — Implemented fine-grained private event eligibility (age & gender filters), JWT authentication, RBAC, and an invite-based onboarding system.

- ▶ **Media & performance** — Integrated Cloudinary for optimized media storage and delivery; handled image compression and push notification pipelines.
- ▶ **App store deployment** — Managed the full release pipeline on both Google Play Console and Apple App Store Connect: app signing, metadata, screenshots, privacy policy (18+ adults), age ratings, and production launch.

AI-Based Video Summarizer · Final Year Project

React.js · Node.js · Express.js · Python · OpenAI API / Whisper · MongoDB

- ▶ Engineered a full-stack AI web app that auto-generates concise summaries from uploaded or linked videos using OpenAI Whisper for transcription and GPT for NLP summarization.
- ▶ Built JWT authentication, role-based access control, real-time processing status updates, and a responsive React.js UI backed by a Node.js/Express.js REST API with MongoDB persistence.

Attendance Tracker App

React Native (Expo) · Node.js · Express.js · MongoDB · Google Maps API · JWT · Redux Toolkit

- ▶ Dual-role mobile app (Admin / Employee) enabling admins to monitor live GPS locations on a map, manage attendance records, and automate payroll calculations.
- ▶ Implemented real-time clock-in/clock-out, payable hours computation, leave management, and an analytics dashboard; secured end-to-end with JWT and RBAC.

Family Album App

React Native (Expo) · Node.js · Express.js · MongoDB · Cloudinary · Socket.io · JWT

- ▶ Private social media mobile app for families featuring invite-based onboarding, photo/video uploads via Cloudinary, and real-time likes/comments powered by Socket.io.
- ▶ Architected the Node.js/Express.js REST API with MongoDB; engineered media compression, push notifications, and a JWT-secured invite-link system.

Personal Portfolio Website

React.js · Framer Motion · Vercel

- ▶ Designed and deployed a responsive, animated developer portfolio with smooth page transitions; live at softwareengineersultan55.vercel.app.

TECHNICAL SKILLS

Frontend	React.js, JavaScript (ES6+), TypeScript (basic), HTML5, CSS3, Responsive Design, Framer Motion
Mobile	React Native (CLI & Expo), iOS & Android, Android Foreground Services, Push Notifications
Backend & APIs	Node.js, Express.js, REST API Design & Integration, Socket.io, PHP
Databases	MongoDB, MySQL, PostgreSQL, Prisma ORM
State & Auth	Redux Toolkit, Context API, JWT, Role-Based Access Control (RBAC)
UI Libraries	Material UI, Tailwind CSS
App Publishing	Google Play Console, Apple App Store Connect, App Signing & Certificates, Store Listing & ASO, Privacy Policy Compliance, Age Ratings, Production Release Management
DevOps & Tools	Git & GitHub, Vercel, Figma to Code, Cloudinary, Payment Gateways, Agile / Sprint Workflows

EDUCATION

BS Software Engineering · Minhaj University Lahore · 2021 – 2025

Relevant Coursework: Web Engineering, Object-Oriented Programming, Data Structures & Algorithms, Software Architecture & Design, Database Systems, Design & Analysis of Algorithms.

CERTIFICATIONS & TRAINING

Full Stack Web Development Bootcamp

Comprehensive training covering HTML, CSS, JavaScript, PHP, and the complete MERN stack (MongoDB, Express.js, React.js, Node.js).

LANGUAGES

Urdu (Native) **English** (Professional Working Proficiency)
