

Muhammad Sultan

Software Engineer | Full Stack & Mobile Developer

📍 Township, Lahore, Pakistan • 📞 +92 307 887 3362 • ✉ 244msultan@gmail.com • 🌐 softwareengineersultan55.vercel.app

PROFESSIONAL SUMMARY

Results-driven Software Engineer and final-semester BS Software Engineering graduate with 8+ months of hands-on project experience building production-grade web and mobile applications. Proficient in the MERN stack, React Native, and REST API integration. Adept at delivering clean, scalable code, collaborating in agile teams, and translating Figma designs into pixel-perfect interfaces. Seeking a full-time role where I can contribute immediately while continuing to grow as an engineer.

PROFESSIONAL EXPERIENCE

Junior Software Engineer Weiblocks

Oct 2025 – Present

DHA Phase 6, Lahore, Pakistan

- › Built and shipped 8+ cross-platform mobile applications using React Native (CLI & Expo) for iOS and Android, including: Step & Water Tracker, To-Do List, Human-to-Animal Translator, Neuro-Nation Brain Training, Vision Board, Daily Medicine Reminder, and ABC Learning App.
- › Contributed to frontend development for the Expensia web platform using React.js, implementing dynamic UI components and integrating RESTful APIs.
- › Implemented Android native foreground services to enable reliable background task execution in mobile apps.
- › Integrated third-party REST APIs and managed state efficiently using Redux Toolkit and Context API.
- › Maintained version control discipline through Git & GitHub; participated in code reviews and followed agile sprint workflows.
- › Translated Figma mockups into responsive, production-ready interfaces using Material UI and custom CSS.

TECHNICAL SKILLS

Frontend	React.js, JavaScript (ES6+), HTML5, CSS3, Responsive Design, Framer Motion
Mobile	React Native (CLI & Expo), iOS & Android, Android Foreground Services
Backend & APIs	Node.js, Express.js, REST API Design & Integration, PHP
Databases & ORM	MongoDB, MySQL, PostgreSQL, Prisma ORM
State & Auth	Redux Toolkit, Context API, JWT, Role-Based Access Control (RBAC)
UI Libraries	Material UI, Tailwind CSS
DevOps & Tools	Git, GitHub, Vercel, Figma to Code, Payment Gateway Integrations
Languages	JavaScript, TypeScript (basic)

KEY PROJECTS

Expensia – Expense Tracking Web App | React.js, Node.js, MongoDB, REST API

- › Developed and maintained core frontend features; integrated backend APIs for real-time expense tracking and reporting.

Neuro-Nation Brain Training App | React Native (Expo), Redux Toolkit

- › Built an interactive cognitive training mobile app with multiple mini-games, progress tracking, and animated UI.

Daily Medicine Reminder App | *React Native CLI, Android Native Foreground Services*

- › Engineered persistent background reminders using Android native foreground services, ensuring notifications fire reliably even when the app is in the background.

Personal Portfolio Website | *React.js, Framer Motion, Vercel*

- › Designed and deployed a responsive developer portfolio with animated transitions; live at softwareengineersultan55.vercel.app.

AI-Based Video Summarizer | *Final Year Project* | *React.js, Node.js, Express.js, Python, OpenAI API / Whisper, MongoDB*

- Developed a full-stack AI-powered web application as my final year degree project that automatically generates concise text summaries from uploaded or linked videos using AI transcription (Whisper) and natural language summarization (OpenAI API).
- Built a React.js frontend with a Node.js/Express.js REST API backend; implemented video upload handling, real-time processing status, and summary display with MongoDB for data persistence.
- Integrated JWT authentication, role-based access control, and a clean responsive UI; applied agile development practices throughout the project lifecycle from design to deployment.

Attendance Tracker App | *React Native (Expo), Node.js, Express.js, MongoDB, Google Maps API, JWT, Redux Toolkit*

- Built a dual-role cross-platform mobile app with separate Admin and Employee interfaces; admins can monitor live employee locations on a map, manage attendance records, and handle payroll calculations.
- Implemented real-time GPS location tracking, clock-in/clock-out functionality, payable hours computation, leave management, and an admin dashboard with attendance analytics and employee management.
- Secured with JWT authentication and RBAC; used Redux Toolkit for state management and Node.js/Express.js REST API with MongoDB for the backend.

Family Album App | *React Native (Expo), Node.js, Express.js, MongoDB, Cloudinary, Socket.io, JWT*

- Designed and built a private social media mobile app for families, featuring invite-based membership so only invited family members can join and contribute to shared albums.
- Implemented photo and video upload with Cloudinary storage, album creation and management, real-time likes and comments using Socket.io, and a personalized feed for each family member.
- Built a full Node.js/Express.js REST API backend with MongoDB; handled media compression, push notifications, and JWT-secured invite-link system for onboarding new family members.

EDUCATION

BS Software Engineering | [Minhaj University Lahore](#)

2022 – 2026

Lahore, Pakistan

- › Relevant Coursework: Web Engineering, Object-Oriented Programming, Data Structures & Algorithms, Software Architecture & Design, Database Systems & Management, Design & Analysis of Algorithms.

CERTIFICATIONS & TRAINING

Full Stack Web Development

- › Completed a comprehensive full-stack bootcamp covering HTML, CSS, JavaScript, PHP, and the complete MERN stack (MongoDB, Express.js, React.js, Node.js).

CORE STRENGTHS

- | | |
|---|--|
| › Fast learner — adapts quickly to new frameworks | › Experience with full product lifecycle (design → deploy) |
| › Strong problem-solving & debugging skills | › Team player with async & agile experience |
| › Clean, maintainable code advocate | › Self-motivated, takes ownership of tasks |

LANGUAGES

Urdu (Native) **English** (Professional Working Proficiency)
